PROFIL

A highly driven Information Systems student offering a unique convergence of UI/UX design innovation and Full-Stack engineering proficiency. Recognized for designing user-centric, award-winning interfaces and flawlessly executing their implementation through modern web architectures. Highly skilled in leveraging modern development stacks (e.g., Laravel, Tailwind CSS) to bridge the gap between aesthetic usability and robust system performance.

EDUCATION

Bachelor of Information Systems, Amikom University Yogyakarta	2023 - Present
GPA: 3.95 / 4.00	
Senior High School, SMA Negeri 1 Sragen	2020 - 2023
Active in student organization (Scout).	

PROJECT

VetLink - Veterinary Clinic Management SaaS

Role : UI/UX Designer

Architected an integrated B2B SaaS platform for veterinary clinics to manage medical operations and subscriptions.

- Designed complex dual-dashboard interfaces for Clinic Admins and Super Admins to systematically organize high-density medical and inventory data.
- Executed a user-centric design approach that led the project to win 1st Place at the FOSTIFEST 2025 competition.

Zave Wallet - Smart Digital Wallet

Role : UI/UX Designer

Designed a smart digital wallet focusing on daily transactions, goal-based savings, and foreign currency exchange.

- Engineered frictionless onboarding flows and complex secure transfer prototypes, resulting in a Nominee position in the AMICTA UI/UX category.
- Collaborated with a team to map out extensive prototyping flows to balance financial logic with a clean, user-centric interface.

HIMASI Official Website

Role : Full-Stack Developer

- Developed a modern, responsive frontend using Tailwind CSS and a robust backend management system utilizing Laravel Filament.
- Successfully implemented a "Question Bank" (Bank Soal) and an "Aspirasi" module to bridge academic communication gaps.

K-REC V2 - Recommendation Engine

Role : Full-Stack Developer

Built a Korean Drama recommendation system using Item-Based Collaborative Filtering to provide personalized suggestions.

- Researched and implemented the Cosine Similarity algorithm to calculate relationships between items based on user rating patterns.
- Integrated complex mathematical models into a functional web application using Native PHP, MySQL, and Tailwind CSS.

Nimble Store - E-Commerce Platform

Role : Back-End Developer

Developed a modern shoe e-commerce platform focusing on responsive design and secure administrative control.

- Architected the backend infrastructure and secure admin dashboard using CodeIgniter 3 to manage product catalogs and orders.
- Implemented secure authentication and CRUD operations for users, products, and comments.

EXPERIENCE

Head of Science and Technology Research Department (IPTEK)

2024 - 2025

Leading the department's initiatives to bridge the gap between academic theory and practical technology application.

- Initiated and led the development of the official HIMASI website, transforming it into a centralized digital hub for students.
- Implemented a "Question Bank" (Bank Soal) and an "Aspirasi" feedback system to solve real academic communication gaps within the study program.

Forum Asisten, Universitas Amikom Yogyakarta

2025 - 2026

Teaching Assistant

Facilitated laboratory courses for the Information Systems Bachelor's Program, guiding students in practical software development.

- Guided students in fundamental web design concepts, front-end development, and web-based marketplace development utilizing Laravel and Tailwind CSS.
- Assisted lecturers in delivering comprehensive laboratory materials focusing on backend architecture and logic using PHP and the Laravel framework.
- Evaluated student assignments, provided constructive technical feedback, and mentored students in translating theoretical concepts into functional applications.

Ikatan Mahasiswa Bidikmisi & KIP-K Amikom

2024 - 2025

Human Resources Development Division (Divisi PSDM)

Managing HR activities and member involvement in the organization.

- Fostered student engagement and facilitated organizational development initiatives to support the Bidikmisi & KIP-K student community.
- Handled interpersonal communications and coordinated member activities to ensure an active and supportive organizational environment.

ACHIEVEMENTS

- **Winner, 1st Place in UI/UX Competition – FOSTIFEST** 2025
- **Nominee, Digital Business & Fintech Category – GEMASI Amikom** 2026
- **Nominee, UI/UX Design Category – AMICTA Amikom** 2025
- **Participant, PKM-VGK (Video Gagasan Konstruktif) – Ministry of Education, Research, and Technology RI** 2024

SKILLS

Language: Indonesia, Inggris

Software: Visual Studio Code, Android Studio, Figma

Others: Javascript, Kotlin, PHP, Laravel, Code Igniter, Tailwind, Git, Github, MySQL
